- With overflow function to prevent waterlogging

LECHUZA's charming tower

Looking for luscious decor? Meet the CASCADA Color planter. This unique planter offers plenty of room for a wide variety of plants in both the top and eight side openings. And best of all, with the optional expansion set, you can stack two or three planters on top of each other to build a 49 in | 124 cm tall plant tower that perfectly showcases hanging and climbing plants. Growers can also use it as a stand-alone planter, place several planters in a row, or create another arrangement for wonderful color combinations with flowering plants and green foliage.
